PROFESSIONAL SUMMARY

I am a Software Developer with over 4 years of experience building and maintaining web applications that are secure, scalable, and easy to maintain. Throughout my career, I have worked on SaaS platforms, fintech applications, AI-powered solutions, and enterprise software, helping turn business requirements into reliable products. My core expertise includes PHP, Laravel, MySQL, JavaScript, RESTful APIs, payment gateway integration, and database optimization. I enjoy writing clean, efficient code, solving complex technical problems, and improving application performance. I work well in collaborative environments and have experience contributing throughout the entire software development lifecycle, from planning and development to deployment and ongoing maintenance.

TECHNICAL SKILLS

Programming Languages: PHP, JavaScript (ES6+), SQL, HTML5, CSS3

Frameworks & Libraries: Laravel, jQuery, AJAX, Bootstrap

Database Technologies: MySQL, Eloquent ORM, Database Design, Query Optimization

API Development & Integration: RESTful APIs, JWT Authentication, OAuth2, Third-Party API Integration

Payment Gateway Integration: Stripe, PayPal, CoinPayments, Coinbase Commerce, NowPayments

AI Technologies: OpenAI API, Google Gemini API, Cloud

Development Tools: Git, GitHub, cPanel

PROFESSIONAL EXPERIENCE

Software Developer

Z8Tech | Jun 2022 – March 2023

- Developed Laravel-based business applications and backend services.
- Implemented third-party API integrations and backend automation solutions.
- Improved database performance through query optimization and schema improvements.
- Worked with development teams to build maintainable and scalable software systems.
- Participated in feature implementation, testing, deployment, and maintenance activities.

Software Developer

THESOFTKING Limited | April 2023 - Present

- Developed and maintained scalable SaaS applications and enterprise-level web systems using PHP and Laravel.
- Designed and implemented secure RESTful APIs for web and mobile applications.
- Integrated multiple payment gateways and fintech services to support secure digital transactions.
- Built AI-powered automation tools, content generation systems, and business productivity solutions.
- Optimized database architecture and application performance to improve scalability and reliability.
- Participated in system design, deployment, maintenance, and feature planning activities.
- Collaborated with cross-functional teams following Agile development methodologies.

KEY PROJECTS

- **FanelPro** | https://fanels.com /

Designed and developed a SaaS-based business automation platform that enables organizations to streamline customer management, workflow automation, team collaboration, and operational reporting. Implemented multi-tenant architecture, role-based access control, subscription management, and scalable backend services to support growing business operations.

Technologies: Laravel, PHP, MySQL, JavaScript, REST API

- **Digitstem** | https://digitstem.com/

Contributed to the development of a fintech platform providing virtual banking services, DPS management, digital transactions, account management, and financial reporting capabilities. Implemented secure transaction processing, API integrations, and backend modules while maintaining high security and reliability standards.

Technologies: Laravel, PHP, MySQL, Fintech APIs, Payment Gateway Integration

- **Drivelaar** | https://drivelaar.com/

Built a fleet and vehicle management solution that helps organizations manage vehicles, drivers, trip scheduling, maintenance tracking, and operational reporting. Developed backend systems that improve fleet visibility, resource utilization, and day-to-day operational efficiency.

Technologies: Laravel, PHP, MySQL, REST API

- **Business Globalizer** | https://app.businessglobalizer.com/

Worked on a business growth and financial services platform designed to support customer onboarding, operational workflows, business management, and reporting. Developed secure backend modules, business process automation features, and analytics capabilities to support organizational growth.

Technologies: Laravel, PHP, MySQL, REST API

- **Visermart** | https://script.viserlab.com/visermart/demo

Visermart is a modern Laravel-based eCommerce platform designed for building scalable online stores. It provides a complete shopping solution with advanced product management, inventory tracking, order processing, secure payment integration, promotional tools, SEO optimization, and a powerful admin dashboard, delivering a seamless experience for both customers and store administrators.

Technologies: Laravel, PHP, MySQL, REST API

- **Visertube** | https://script.viserlab.com/visertube

ViserTube is a Laravel-based video sharing platform that enables users to upload, stream, and monetize video content. It includes HD video streaming, live streaming, Shorts/Reels, creator channels, subscriptions, playlists, secure payment integration, ad monetization, and a comprehensive admin dashboard, making it an ideal solution for building a scalable YouTube-like platform.

Technologies: Laravel, PHP, MySQL, REST API

Vdemy | https://next-demo.viserlab.com/vdemy
Admin: https://script.viserlab.com/vdemy/admin

Vdemy is a modern Learning Management System (LMS) built for creating and selling online courses. The platform enables instructors to publish video courses, manage students, track earnings, and issue certificates,

while providing students with an interactive learning experience through quizzes, assignments, progress tracking, and secure online payments. It features a powerful admin panel, multi-language support, and scalable architecture for educational businesses.

Technologies: Laravel, PHP, MySQL, REST API, Next.js

EDUCATION

Bachelor of Science (B.Sc.) in Computer Science & Engineering
University of Creative Technology, Chittagong
CGPA: 3.54 / 4.00 | Year of Graduation: 2023

EXTRA-CURRICULAR ACTIVITIES

Vice President
UCTC Computer Club | Jan 2022 - Jan 2023

LANGUAGES

- Bengali (Native)
- English (Professional Working Proficiency)
